

A schematic diagram showing a fluid flow between two reservoirs. The top reservoir is shaded light red and the bottom reservoir is shaded light blue. A vertical line separates the two reservoirs. In the top reservoir, a downward arrow is labeled $Q_h > 0$. In the bottom reservoir, a downward arrow is labeled $Q_c > 0$. A curved line connects the two reservoirs, and a horizontal arrow pointing to the right is labeled $W > 0$.

$$Q_h > 0$$

$$Q_c > 0$$

$$W > 0$$
