

A schematic diagram of a thermodynamic cycle. A central vertical rectangle is bounded by two vertical lines. To the left of this rectangle is a light red shaded region at the top and a light blue shaded region at the bottom. To the right of the rectangle is a light blue shaded region at the bottom. A downward-pointing arrow is located in the upper part of the central rectangle, and an upward-pointing arrow is in the lower part. To the right of the central rectangle, a horizontal arrow points left towards the right boundary, and a curved line connects the right boundary to the central rectangle. The labels $Q_h > 0$, $Q_c > 0$, and $W > 0$ are placed near their respective arrows.

$$Q_h > 0$$

$$Q_c > 0$$

$$W > 0$$
